

Introducing the Competence Center in Subject Didactics of Francophone Switzerland (2Cr2D)

What's behind the acronym ?
A multi-year, multi-disciplinary experience, and many breakthroughs along the way.

Between 2016 and 2023, the 2Cr2D has **united actors across didactics and institutions** in a common pursuit : ensuring a **strong French-speaking presence in the field, within and beyond national borders**.

A shared ambition matched by solidary values, as the Center's training and support capitalizes on scientific and human resource sharing.

A historical achievement

2005 | First case for a **regional** doctoral program centering subject-specific education

2013 | First **local CAS** offer and notion of an interinstitutional centre of competence in the field

2015 | A **collective vision** gets defined. The 2Cr2D is on its way

2017 | **Implementation phase**
4.7 mio

2021 | **Consolidation phase**
4.6 mio

2023 | Transition begins :
a **new structure** in sight ...

Detailed
milestones
(in French)

A comprehensive concept

1. Laying the foundations : two-level scientific training

2. Promoting knowledge circulation and network consolidation

A strong online identity and outreach strategy

All stakeholders – from students to coordinators, researchers to higher management – have been actively involved in initiation and regulation.

As of April 2024, they face highly stimulating challenges : securing 8 years' worth of impact, appraising collective efforts in light of organizational autonomy, and **adjusting the vision** accordingly.
